So..for all of you who want an alternative entertainment!

We have given you a listing to help you.

Download Instructions

Click on a zip file – select save to disc and specify the location you wish to save the file to or right click the link and select and save target as...

These are very large files and can take hours to download even using broadband. It may be helpful to use a program such as ***Get Right Download Manager*** (www.getright.com) or ***Download Express*** (www.metaproducts.com), both of which support resuming of incomplete downloads.

Average download time on a 'slow' broadband connection (512KB) is about 30 mins per 100 MB of file size.

After download, double click the file in its new location. It should then unzip into a folder (again, you are given the option of where to unzip the file). It will self-extract – you do not need to use unzipping software.

Special Resource
