

Review Module D2 Test Philosophy
Level Quantum Biofeedback Practitioner

Remember to record your hours and score for your IMUNE Qualification Application.

No.	Lev	Question.....	Ans.
General			
1.	QBP	All of the test information is contained in the main test matrix screen.	
2.	QBP	Sub-screens such as nutrition, allergy etc. present the information in a more discrete way, enabling focus on specific areas	
3.	QBP	When the Athlete focus has been selected the test information will relate more to performance than health.	
4.	QBP	Information in the Homeopathic Screen is additional to the test screen.	
Reactivity			
5.	QBP	Reactivity is a reaction to activity.	
6.	QBP	Active issues represent the client deep, chronic issues.	
7.	QBP	Active issues can be considered as today's issues.	
8.	QBP	Active issues may hint at or be a "leak through" from a chronic issue.	
9.	QBP	Chronic issues will show as a high score.	
10.	QBP	Important issues can be anywhere in the test matrix.	
11.	QBP	The score values are independent of the SOC values.	
12.	QBP	Chronic issues often have low reactivity	
13.	QBP	Chronic issues are more likely to be found in the lowest scores.	
14.	QBP	The red and purple band items are the active today part of the picture.	
15.	QBP	A good question to ask is why has the client reacted to this item	
16.	QBP	If a client is not showing a reactivity to a known issue a good questions is why isn't the client reacting to this item	
17.	QBP	In the above situation it is possible that the body has adapted to the situation (is no longer reacting) and may need reminding via an individual reaction	
18.	QBP	Stimulate reaction is an option for a very definite issue that is not showing reactivity or resonance	
The items which are important in client's health are:			
19.	QBP	Just the red band items.	
20.	QBP	Just the purple band items.	
21.	QBP	Only the items at the bottom of the test matrix score list.	
22.	QBP	The items at the top and bottom of the score matrix list are likely to be the most relevant for working with	
23.	QBP	Potentially any item in the test matrix.	
The items at the bottom of the test matrix:			
24.	QBP	Have no importance.	
25.	QBP	Are definitely items that the client does not have a problem with.	

26.	QBP	Are items that the client has shown an unusually low reactivity to.	
27.	QBP	Are items that may represent deep seated chronic issues of the client.	
<i>Chronic client issues are likely to show:</i>			
28.	QBP	At the top of the test matrix.	
29.	QBP	Lower score values	
<i>There is no colour coding for items at the bottom of the test matrix because:</i>			
30.	QBP	They have no importance.	
31.	QBP	The software is unable to do this.	
<i>The most likely items that could be significant that may be at the bottom of the test scores are:</i>			
32.	QBP	Active items.	
33.	QBP	Food allergies.	
34.	QBP	Inhalant allergies.	
35.	QBP	Suppressed issues.	
36.	QBP	Chronic issues.	
<i>The top score items in the test matrix represent:</i>			
37.	QBP	A definite statement on the client's health.	
38.	QBP	A possible currently active issue.	
39.	QBP	The client's deep seated chronic issue.	
40.	QBP	Possible leak through from a chronic issue.	
<i>In zapping or treating the top significant items for the client:</i>			
41.	QBP	is always tremendously useful.	
42.	QBP	is possibly useful.	
43.	QBP	will deal with deep seated client issue.	
44.	QBP	will possibly relieve some stress from the client and re-enable intrinsic mechanisms	
<i>Valid aspects of the process for assisting a client's health recovery are:</i>			
45.	QBP	Identify and remove stressors, support affected organs.	
46.	QBP	Zap the top pathogens whatever their scores.	
47.	QBP	Work on the client's statement of the top complaints.	
48.	QBP	Do the system recommended therapies.	
49.	QBP	Try to integrate information from the system with the client's world and treat accordingly.	
<i>The test matrix scores are:</i>			
50.	QBP	A probability.	
51.	QBP	A possibility.	
52.	QBP	A hint.	
53.	QBP	Irrelevant.	
<i>A high reactivity score:</i>			
54.	QBP	Should be zapped for 3 minutes.	
55.	QBP	Should be checked out to see if it corroborates with the client's real world.	
56.	QBP	Can be checked for corroboration by doing an individual reaction.	
57.	QBP	The client should always be given a remedy for that item.	
58.	QBP	Chronic Conditions may hide in the blue band	

		<i>What are the <u>most likely possibilities</u> for a known or confirmed or unequivocal diagnosis not to show as a high reactivity score in the test matrix:</i>	
59.	QBP	The diagnosis is wrong.	
60.	QBP	The client had that condition and no longer has it.	
61.	QBP	The condition has been with the client for so long that the body system has adapted to it and is no longer reactive.	
62.	QBP	It is a degenerative condition in a certain stage that does not show reactivity.	
63.	QBP	That particular item is not represented in the test matrix.	
		<i>The test matrix contains:</i>	
64.	QBP	Every possible disease, process and condition that an organism could have	
65.	QBP	A sampling of the main processes that occur within an organism	
		<i>In respect of the function of an organism:</i>	
66.	QBP	There are only thousands of processes occurring at once.	
67.	QBP	There are only millions of processes occurring at once.	
68.	QBP	There are trillions of processes occurring at once.	
69.	QBP	The organism functions change only very slowly.	
70.	QBP	The organism functions are extremely dynamic.	
		<i>The user has found that an item is significant and has corroborated that it is a real issue. On the next visit:</i>	
71.	QBP	The item will show as a high reactivity score.	
72.	QBP	The resonance value will be a good indication of the energetic status of the item.	
		<i>Within the program the following can be used for corroborating that an item is significant:</i>	
73.	QBP	Zapping.	
74.	QBP	Running a second test immediately.	
75.	QBP	Doing an individual reaction test.	
		<i>Which of the following words are appropriate in describing high reactivity score:</i>	
76.	QBP	Diagnostic.	
77.	QBP	Pre-diagnostic stress assessment or evaluation	
78.	QBP	Probability.	
79.	QBP	Hint.	
80.	QBP	Possibility.	
81.	QBP	15% chance of being an error.	
		<i>The test matrix items are:</i>	
82.	QBP	Remedies that the client should take.	
83.	QBP	Homeopathics.	
84.	QBP	A means to ask the client if an item is significant.	
		<i>The descriptions in the name column of the test matrix are:</i>	
85.	QBP	Carriers of information.	
86.	QBP	It is the names of remedies that are important and not the	

		information/association	
87.	QBP	Information that should be examined to see if it provides possibilities for understanding the client's current health process.	
Test scores can represent:			
88.	QBP	A thought.	
89.	QBP	A significant other's issue.	
90.	QBP	A future possibility.	
91.	QBP	A current physical process.	
92.	QBP	A future concern.	
93.	QBP	Only that persons real issues	
94.	QBP	A physically resolved but still energetically present issue.	
The test dialogue relates to:			
95.	QBP	Only the physical aspect of the client.	
96.	QBP	The client alone.	
97.	QBP	Possible imprint of another person, idea or other exposure.	
98.	QBP	Anywhere in the spiritual, physical, emotional or mental field of a client.	
When a female issue shows on a male:			
99.	QBP	You have definitely entered the wrong sex.	
100.	QBP	The program has made a mistake.	
101.	QBP	There is someone in the client's world that has this issue.	
102.	QBP	The client had this issue in a past life.	
103.	QBP	The client has seen a movie on this issue and would/would not want to have it.	
104.	QBP	This is the nearest piece of information the system can give due to the limited dialogue the system can have.	
In the test process the system:			
105.	QBP	Can ask every question about everything in the organism.	
106.	QBP	Has a limited dialogue.	
107.	QBP	Is a little bit like a Frenchman trying to give an answer in French to a schoolboy who has only very limited French understanding.	
The remedies in the test matrix are:			
108.	QBP	Important because they define what remedy should be given to the client.	
109.	QBP	The meaning of the remedy i.e. its association is more important than the remedy.	
110.	QBP	If a remedy is corroborated as important for the client is it necessary to give that particular remedy.	
111.	QBP	If a remedy is corroborated as important for the client will an equivalent remedy or stress reduction therapy is a valid route.	
Subscreens			
112.	QBP	There are many screens which display information specific to an area	
113.	QBP	Allersodes, sarcodes, minerals, vitamins are examples	
114.	QBP	The idea is to present related information in one place	
115.	QBP	In many but not all subscreens the values are taken directly from the	

		test screen	
116.	QBP	In these screens the colour banding may be specific to the subscreen and not be the same as the main test screen colour banding	
117.	QBP	The subscreens can be reviewed for balance and highs/lows to give information that can be further checked in the main test screen	
118.	QBP	An item may be significant in a subscreen but not significant in the test screen.	
<i>Examples where the information is taken directly from the test screens are</i>			
119.	QBP	Allersodes	
120.	QBP	Homeopathic Activation	
121.	QBP	Vitamins	
122.	QBP	Sarcodes	
123.	QBP	Minerals	
<i>Other screens derive information in other ways</i>			
124.	QBP	Minerals is a calculation of all the mineral items from the test screen	
125.	QBP	Minerals is a retest on the groups	
126.	QBP	Some Homeopathic screen items display I that screen only	

If a question or the answer is unclear please discuss with colleagues/your trainer. It will not be possible for IMUNE to respond to individuals for clarification. If after discussing as above clarification is required then please do contact OBP@imune.net.
