

Review Module D4 Risk Profile
Level Quantum Biofeedback Therapist

Remember to record your hours and score for your IMUNE Qualification Application.

No.	Lev	Question.....	Ans.
1.	QBP	Risk Profile can indicate the most probable risk the client has right now in their health state.	
2.	QBP	Risk Profile has a seyle bar which shows the level of stress progression	
3.	QBP	Risk Profile allows us to see correlations within the test matrix so that when we close using the bottom close button 'x' will appear to the left of the Auto Zaps, which correlate, to it.	
4.	QBP	In Risk Profile only one item can correlate to the Auto Zaps in the Test Matrix and you must choose which one you want.	
5.	QBP	With Clients who eat the Great American Diet Ameba and Bacteria often show as the highest concern in the Risk Profile	
6.	QBP	Risk Profile shows in list form: we can change that list from Value to Number order: both can be printed but for graph purposes the Number order is easier to interpret and read	
7.	QBP	Choosing any item in the risk profile will open and highlight the Virtual Doctor Test	
8.	QBP	Risk profile may be accessed directly off the Main Screen, the test matrix Programs drop down and within Homeotoxicology and Nutrition	
9.	QBP	Risk profile has access to Oriental Herbs, Minerals, Amino Acids, Aroma Therapy and Perverse Energy, ElectroMag Stat which allow therapy on areas of imbalance	
10.	QBP	Risk Profile gives a list in numeric form of the most probable reaction of specific risks to the client.	
11.	QBP	Risk Profile usually has Trauma and Stress as the highest risk factors on most clients	
12.	QBP	Risk Profile tends to have Sugar Regulation and Food Poisoning as the highest issues for most clients due to the great American diet, with toxic food and white process sugar and flour use.	
13.	QBP	Risk profile allows you to see and print a graph of the information within the Risk Profile list	
14.	QBP	Risk profile allows you to look at the Selye Bar which lets you interpret the Alarm, Adaptation and Exhaustion phase of your client due to the issues of the Risk profile	
15.	QBP	Risk profile when closed by the bottom close button will place an x next to items in the Auto Zaps Test Matrix for items, which relate to the highest items in the Risk Profile.	
16.	QBP	Risk Profile takes the information from the test matrix and places it	

		into categories of Risks of the client. By looking at the coloring and numbering of this list we can visualize which may possibly be chronic or acute items.	
17.	QBP	Double clicking an item will load it into the top right hold box	
18.	QBP	Clicking “Treat Areas Above” will treat that item for approximately 20 seconds	
19.	QBP	This can be used for more than one item	
20.	QBP	Risk profile provides access to Virtual Doctor which can be used for more specific hints	

If a question or the answer is unclear please discuss with colleagues/your trainer. It will not be possible for IMUNE to respond to individuals for clarification. If after discussing as above clarification is required then please do contact QBP@imune.net.
